but the Encyclopædia Britannica seems to be on reasonable ground when it says that "Literature" is "a general term which, in default of precise definition, may stand for the best expression of the best thought reduced to writing." "Reduced to words" would suit us a little better, but that will make no great difficulties.

The phase of drama which seems to hop out from beneath even so broad a term as literature is pantomime. "Plerrot the Prodigal," for instance, is most certainly drama, and yet, since it takes no articulate shape save in its musical accompaniment, it cannot be classed as literature. Until a company and an orchestra have assembled the piece exists merely as a manual of stage discovered thinker and a suddence and some of his stage directions defy the most skilful producer. You may see "Man and Superman" with any actor you chose as Roebuck Ramsden and yet upon returning from the playhouse you will hardly know so much about the play as the man who sat in the library and read the volume. It will hardly know so much about the play as the man who sat in the library and read the volume. It will hardly know so much about the play as the man who sat in the library and read the volume. It will bardly be the fault of the actor that he is unable to convey the very definite information set down in the stage directions of Act I, "He was born, as a matter of fact, in 1839, and was a Unitarian and Free Trader from his boyhood, and an Evolutionist from the publication of the Origin of Species.
